Ragheda Abo Zedan

Software Engineer | Flutter Developer | Mobile Applications
Damascus, Syria | +963 930 485 673 | raghdazedan83@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Software Engineering graduate and Flutter Developer experienced in building cross-platform mobile apps, from architecture and state management to API integration and real-time features. Skilled in Clean Architecture, BLoC/Cubit, and GetX, with projects spanning payments, live tracking, and push notifications. Detail-oriented, with a testing and QA mindset, delivering reliable, maintainable software.

SKILLS

- **Mobile Development:** Flutter, Dart, Android / iOS, Responsive UI, Flutter Web.
- **Architecture & State Management:** Clean Architecture, MVC, SOLID, Design Patterns, Bloc/Cubit, GetX, Dependency Injection (GetIt), Equatable, Dartz.
- **APIs & Integration:** REST APIs, Dio, JWT, JSON, Firebase (Auth, Firestore, FCM), WebSockets, Google Maps, Geolocator, Stripe, QR Scanner.
- **Local Storage:** Hive, Secure Storage, SharedPreferences.
- **QA & Testing:** Manual & Functional Testing, Integration Testing, API Testing, Test Case Design, Edge Case Analysis, Bug Tracking, Regression Testing, UI/UX Verification.
- **Tools:** Git, GitHub, Postman, Adobe Photoshop
- **Web Basics:** HTML, CSS, JavaScript

EXPERIENCE

Darmesk Company — Flutter Developer Intern Damascus, Syria (05/2024 - 10/2024)

- Developed and maintained cross-platform mobile features using Flutter and GetX, integrating REST APIs with backend services.
- Performed manual and functional testing, identified and tracked bugs, and verified UI implementations against design specifications.

PROJECTS

Musafer - Bus Transport System

- Built a multi-tenant transportation application using Flutter, GetX, and Laravel, featuring live tracking, seat locking, Stripe payments, FCM notifications, and QR code ticket scanning.
- Tested the main booking flows and edge cases before release.

SpendWise – Smart Personal Finance Companion

- Developed a personal finance application using Flutter, BLoC/Cubit, and Clean Architecture, integrating Firebase Authentication, Cloud Firestore and Firebase Cloud Messaging (FCM) for notifications through REST APIs with Dio.
- Implemented transactions, budgeting, analytics, and savings goals, using GetIt for Dependency Injection, Equatable, and Dartz.

Online Complaint Management System

- Created a Flutter application using GetX and MVC for citizen complaint submission and real-time status tracking, featuring FCM push notifications; manually tested key workflows.

Banking System - Design Patterns Showcase

- Designed a banking simulation using GetX and six design patterns: State, Decorator, Composite, Observer, Facade, and Chain of Responsibility; implemented transaction processing and observer-based notifications.

Real Estate & Car Rental System

- Built a multi-role marketplace with search filters, map integration, and role-based permissions; verified API endpoints with Postman.

EDUCATION

Bachelor's Degree in Software Engineering 2026
Damascus University – Faculty of Information Technology

CERTIFICATIONS

- **Flutter Development** – Online Course (03/2023 - 06/2023)
- **Graphic Design (Photoshop)** – Modern Center (12/2022 – 01/2023)
- **Web Development (HTML, CSS, JS)** – SBK Center (10/2023 – 12/2023 | 60 Hours)

LANGUAGES

Arabic (Native) | English (Professional)
